ETPIS | European
Technology
Platform
Industrial Safety

**The cross ETP
initiative on
industrial safety**

7 Good reasons to join us now

1. Stay informed

ETPIS addresses safety of industrial installations and production systems from **various industry sectors**: manufacturing, chemical, oil and gas, buildings, transport systems and related structural components. ETPIS works on the **conventional risks**, the **emerging risks** as well as the **safety technologies, products and services**. Being ETPIS member, you receive **newsletters** about professional news and events.

2. Contribute to the EU2020 strategy

ETPIS through its activities and initiatives provides a **significant contribution to the EU2020 Strategy**, in particular to the sustainability and competitiveness targets, while implementing the ETPIS long term Vision adopted in 2005. This Vision is still up-to-date and very much aligned with the EU 2020 Strategy.

3. Increase your knowledge

ETPIS organizes a series of activities to **promote industrial safety and risk management research & innovation**, and to **disseminate good practices** (e.g. Technical working groups, Brokerage events, Joint programming via SAFERA ERA-NET).

Being ETPIS member, you benefit of a discount registration fees for the ETPIS workshops.

4. Disseminate your research results

The ETPIS workshops are an unique opportunity to **disseminate your research results to a large audience** of experts from industry, academy, policy bodies. ETPIS organizes on a regular basis dissemination events.

5. Expand your network

ETPIS facilitates **cooperation** and enables **constructive exchanges** between industry, regulators, NGOs, trade unions and other social partners, and the research and innovation community.

6. Make your voice stronger

Given the importance of industrial safety to all sectors, ETPIS has been recognized by the European Commission as **cross-ETP initiative**. ETPIS, with regular consultations, is an unique place to **express your expectations and your needs** to the European Commission in term of industrial safety for any industrial sector.

7. Better address Horizon 2020 challenges

In Horizon 2020, **all innovative projects will include a risk management strategy** (Risk Mngt) to address at an early stage the risk of new products or new technologies, to minimize harms on the users or on the environment and reach the acceptance by the public.
